Station Description

The site is located on the south side of Mount Tabor at a former astronomy site 900 m down hill along access road to the VOR for the Prince George Airport. The point is accessed by travelling 950 metres from the Yellowhead Highway along Giscome Road to a gravel road to Mt. Tabor. Proceed along gravel road for approximately 2.7 km to a split in the road and turn right. Shortly after the road will split again; turn left and continue for approximately 7.5 km from the first split continuing to the left. Make a sharp left turn and proceed up the hill for 350 m to a narrow laneway on the right. At the end of narrow laneway (50m) is cinderblock tower. The point is a brass screw in the middle of a concrete pad marked by an aluminum disk.
